PeerCommerce

Campus Talent & Micro-Business Exchange Portal

PeerCommerce is a university-based digital commerce ecosystem built using Zoho Creator (Low-Code Platform).

The platform enables students to:

- Offer paid services (skills)
- Sell physical or digital products
- Book peer services
- Purchase products
- Manage wallet-based transactions
- Track financial activity via ledger
- Automate workflows and notifications
- Use AI-based classification and prediction
- Operate through a secure student portal
- This application was developed as part of a Low-Code Application Development coursework project.
